Water Treater's Toolbox

At **Kem**, we pride ourselves in our dedication to satisfying customer Needs through unique products and exceptional service. Over the decades, Kem has earned the reputation as an innovator in our field. Our R & D Department constantly strives to develop new products in direct response to Our customer's requests. Our corporate objective is to deliver high quality Maintenance engineering chemical technology that help make our customers More efficient each and every day.

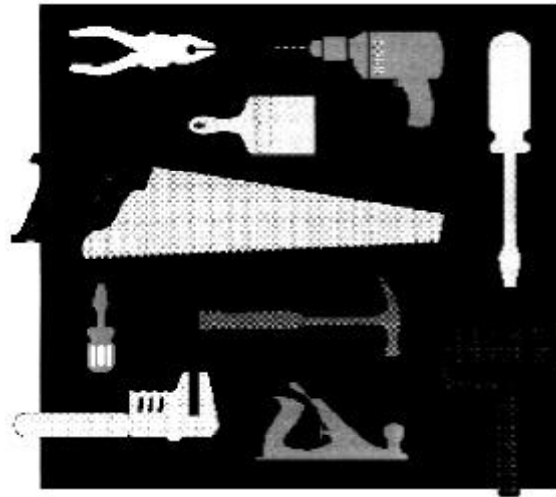

Under our **Trojan Chemicals** labeled products, we have historically formulated, designed and developed significantly advanced environmental chemical technologies, that help make today a better place than yesterday.

Our plant facilities, located in Brampton, Ontario operate under Health Canada's Establishment License criteria to manufacture quality, registered and controlled products, to serve the growing needs of Canadian customers.

From the sales representative's initial call, to the blender, to shipper, the team at **Kem Canada Mfg** stands ready to deliver on the promise of:

Innovative Chemical Technologies

RUST COAT * (TRB 569)**(rust convertor)** 6569/6669

A rust convertor treatment and coating for ferrous metals. Rust Coat converts rusty and corroded metal into a passivated state, that resists re-rusting and corrosion. The treated surfaces may then be painted or coated. Available in aerosol as TRB 569 and in bulk as TRL 669.

**INSTANT ZINC*** (TRB 513)**(cold galvanizing)** 6513

Equivalent to hot dip zinc galvanizing. Rust proofs metal and prevents rust creepage. Highly resistant to water and salt corrosion. Electro-mechanical healing process. Aerosol spray.

TRO-BRITE * (TRB 594)**(stainless steel coating)** 6594

A stainless steel coating designed for repairs to damaged pocked, pitted and tarnished stainless steel. Stainless steel flakes in binding clear resin body. Aerosol spray.

TRO-COAT 4 (TRB 637/ TRL 737)**(synthetic corrosion coating)** 6637/6737

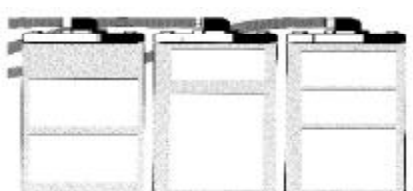

A new completely synthetic coating that protects against water, sludges, acids, alkalies, detergents, salt and salt spray and most environmental elements. Effective to low temperatures (< -40C), Tro-Coat 4 will not peel, chip or crack. Black pliable finish. Easy to apply in aerosol format. Also available in liquid bulk as TRL 737.

TRO-COAT CLEAR (TRL 37)**(temporary protective coating)** 6037

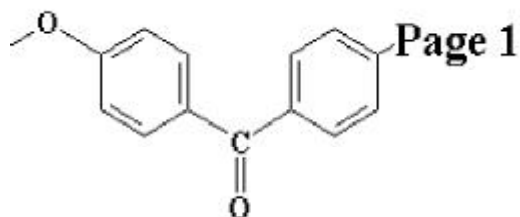

A clear, thin protective coating for lay-ups, storage and shut down applications of equipment and machinery. Sprayable to -40 C. Will not freeze. Light straw coloured liquid. Easily removed with a quality degreaser.

BATTERY TERMINAL (TRB 527)**(protectant-aerosol)** 6527

Aerosol spray treatment for battery terminal posts. Flexible coating that protects against corrosive battery chemicals, greases, oils and engine discharges. Fast drying spray

**METAL PARTS PROTECTOR *** (TRL137)**(corrosion control coating)** 6137 / 6537

Durable, long term corrosion protection coating. Effective against acids, alkalies, chlorides, salt spray, water, moisture and chemicals. Will not chip or peel. May be removed with high quality solvent degreaser. Interior or exterior use. Amber coloured, liquid bulk or handy aerosol spray.

COILEX *

(no rinse coil cleaner)

1119

Removes lint, soil, grease, film and particles from coils. Designed on a formulated natural condensation process, does not require rinsing. Can be used in-place, indoors or outdoors. Safe to use, no residue, no toxic fumes and non-corrosive to metals. Hygroscopic additives allow use as filter adhesive even under demanding applications.

AIR SANITIZER

(TRL 03)

(air disinfectant & deodorant)

6003

Air borne bactericide combined with deodorizer. Used in air intake and spray systems for atomization. Light tangerine odour, excellent coverage, long lasting. Glyol based.

GERMEX *

(air & surface disinfectant)

1357

Virucide for hard surfaces and air. Deodorizes, disinfects and sanitizes. Neutral pH. Light floral fragrance. Non staining residual protects for hours. Can be micro-misted, sprayed, fogged etc.

COIL BIO-FOAM

(enzymatic coil cleaner)

1114

A penetrating, foaming coil cleaner, fortified with enzymes and dispersion agents. Non corrosive to coil metal compositions. Flushes out trapped air borne contaminants and enzymes continue to degrade residuals.

FLO-TABS

(condensate pan treatment)

1574

Slow dissolving tablets for treatment of large air conditioning and condensate pans. Prevents drain blockage caused by sludge rust, scale, dust and atmospheric debris. Tablet form. Contains corrosion inhibitors and quaternary ammonium.

ODORITE

(odour control)

2469

Concentrated liquid reodorizer and deodorizer agent as a space and air system spray to control malodours. Functions on a molecular surround technology. Water soluble, non-flammable, neutral pH. Floral-spice.

DRY MOLY

(TRB 506)

(molybdenum dry lube)

6506

A dry film based on molybdenum disulfide. Used for lubricating and dry-release applications in bearings, ball joints, sleeves etc., where high-low temperature, moisture and corrosivity are problems. Dry film is tenacious and will not attract dust, dirt, grease, oils.

RECOIL

(external coil renovator)

2567

Oxidation and atmospheric film remover for external condenser coils that have impaired efficiencies. Coil and fin treatment. Penetrating action. Dilutable up to 10 parts water.

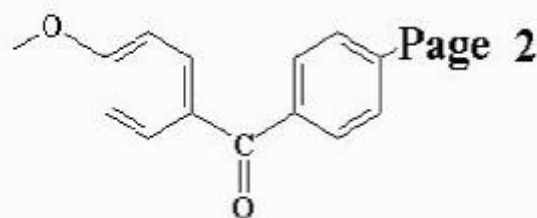

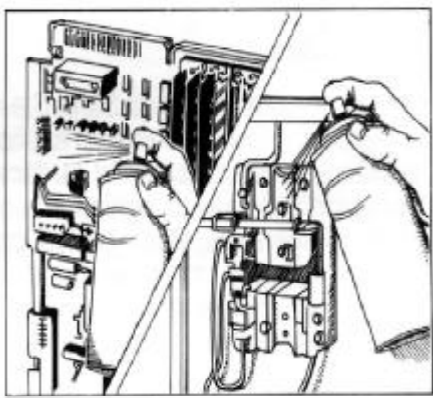

LT 65

(sub zero grease)

1201

Specialty lubricating grease for externally exposed bearings that are subject to wind chill temperatures as low as - 65 F. Does not freeze up and allows bearings to start up on demand.

HI-PURITY (TRB 508)

(electronic cleaner) 6508

Electronic high purity, fast drying solvent and for use on all electrical and electronic circuits. Di-electric breakdown voltage of 35,000 +. Non-conductive, residual free. Aerosol.

TRO-LUBE (TRB 570/TRL 170)

(5-in1 composite) 6570/6170

5-way composite equipment spray providing lubricating, penetrating, cleaning, protecting and moisture displacing properties. Non flammable. Non conductive. Aerosol or liquid version.

CRT SCREEN (TRB 526)

(screen treatment) 6526

Cleaning, brightening and protecting of glass and plastic screens on computers, CRT screens, board, terminal and recording chart screens. Treatment is non yellowing, anti-fog, anti-dust, anti-static, anti smudge and anti-scratch. Meets or exceeds MIL spec. Aerosol.

ANTI-STATIC (TRB 588)

(static control treatment) 6588

An aerosol treatment for the elimination of static electricity and static charges. Non flammable, non staining. Controls all types of surfaces in critical areas.

DRY TEFLON (TRB 577)

(dry lube & release agent) 6577

Lubricates and coats with microscopic film of fluorocarbon telomer. Chemically inert film is colourless and tenacious. Ultra low friction co-efficient. Acts as release agent and lubricant for rubber, metal and plastic parts.

KEMTRONIC

(moisture displacer - corrosion inhibitor) 2231

Moisture displacer and corrosion inhibitor for motors equipment and electrical parts. Provides a flexible protective shield that seals out reoccurring moisture, humidity and corrosion. Available in aerosol and liquid.

TRO-SOLV (TRB 528/TRL 1226)

(electrical safety solvent) 6528/61226

Safety solvent that replaces chlorinated, aliphatic and aromatic solvents. Formulated from natural citrus oils, biodegradable, non-conductive and effective on all types of greases, oils etc. Available in liquid or alternate aerosol.

BLOW CLEAN (TRB 546)

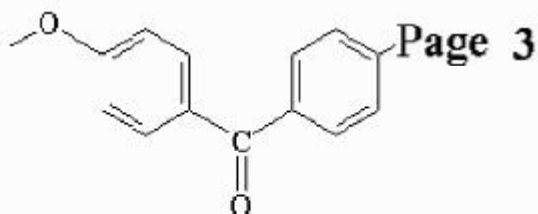

(high purity dust cleaner) 6546

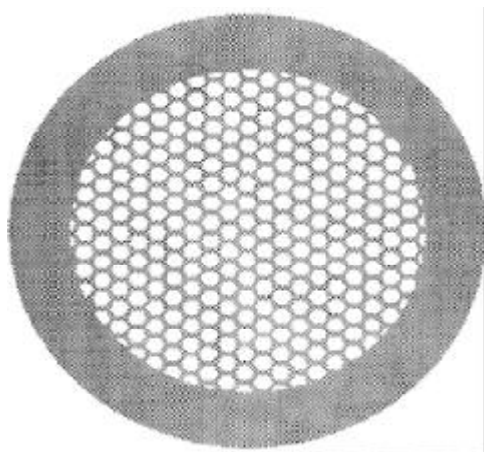

A residue free dust removal spray, formulated as a high purity compressed gas delivery system. Non conductive, moisture free. Used on sensitive electrical and electronic systems, computers, switching gear, etc., to displace dust, lint and airborne particulate matter. Aerosol.

NON-CONDUCTIVE (TRG 431)

(non-melt grease) 6431

A specialty lubricating grease featuring non conductive electrical properties for use in spark free applications. Formulated completely with synthetics. Non-melt (500 + F.) NLGI #2.

NO SWEAT

(TRB 547)

(anti-condensation)

6547

Prevents condensation on cold water pipes, condensers, cold air ducts, water tanks, valves and fittings. Durable, flexible, non-flammable, water resistant. Dries to a white insulating surface. May be wrapped or painted. Aerosol.

KEMSIL

(RTV silicone)

1622

Sealant, adhesive and gasket maker that can be used on any kind of metal, rubber, ceramic, etc. Makes any size shape. Remains permanently flexible from -85 F to 500+ F. Aerosol.

NO-SEIZE

(TRB 590)

(anti-seize)

6590

An ultra high temperature combined anti-seize and lubricant. Anti-galling, anti-pitting, anti-corrosive to 2000 F. Withstands extreme corrosive environments and high moisture conditions. Aerosol.

KEM-A-LOOSE

(superior penetrant)

Non flammable industrial penetrant for nuts, bolts, hinges and fastening equipment, that have seized up or corroded and difficult to remove. Available in both aerosol and liquid bulk.

BELT DRESSING

(TRB 507)

(anti-slip treatment)

6507

Aerosol spray treatment for drive belts. Increases grip and reduces slippage. Increases power transfer. Aerosol.

POLYKEM 10/50

(multi-grade compressor oil)

A combined SAE 10 through 50 weight oil. EP and anti-wear additives.

TRO-CLEAN *

(TRL 401)

(h.d. degreaser)

6401

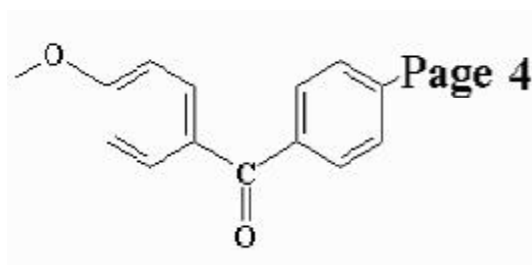

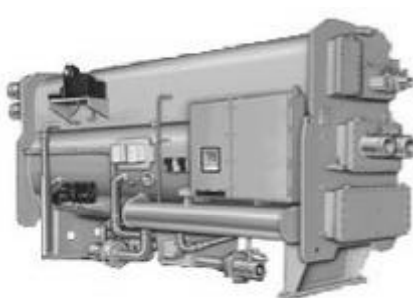

Environmentally sound, highly concentrated degreaser and cleaner for greases, oils, dirt and grime. Readily dilutable with hot or cold water. Contains emulsifiers, penetrants, wetting and sequestering agents.

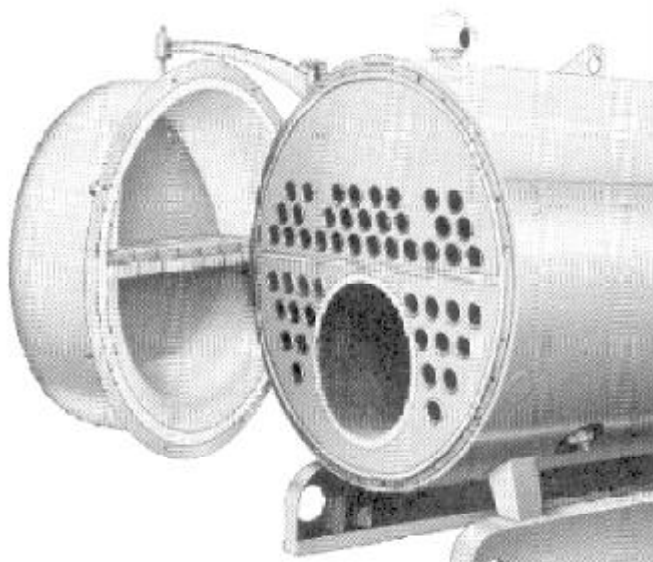

GASKET REMOVER

(gasket & seal remover)

1341

Specialty aerosol solvent that penetrates, softens and assist in loosening and lifting all types of gasket and seal materials. Non corrosive to metal surfaces.

SOOT SWEEP

(fireside catalyst)

7009

Boiler de-sooting treatment for steam or hot water boilers where fuel oil (or coal) creates problems. Increases fuel efficiency. Breaks down and loosens sooty deposits. Catalytic agents reduce fire point of soot for a complete combustion process. Used while boiler is in operation. Non flammable liquid.

FUEL AD

(fuel oil sludge remover)

7004

A balanced performance additive for use in all grades fuel oils from standard #2 to #6 and Bunker C. Corrosion control agents, flow improvers and sludge conditioners, moisture conditioners etc. Combats vanadium corrosion and controls bacterial growth.

FUEL SUPPORT

(fuel conditioner)

7704

A performance additive for improving combustion lighter grades of fuel oils from # 2 to # 6. Desludges, disperses moisture and protects against corrosion. Fights vanadium corrosion and glassy oxide deposits.

FUEL AD CL 130

(pour point suppressant)

7705

A fuel oil conditioner with specific additives to reduce pour points of industrial fuel oils for cold weather applications. Provides better fuel flow. Corrosion inhibited with sludge conditioners.

EMULSIT

(oil spill saturant)

1280

Penetrant and emulsifier for oil and grease spills. Cuts through all types of oils and greases in a matter of minutes. 100 % rinseable. Non caustic, non-acid formulary.

SUPER-ZORB

(advanced absorbant)

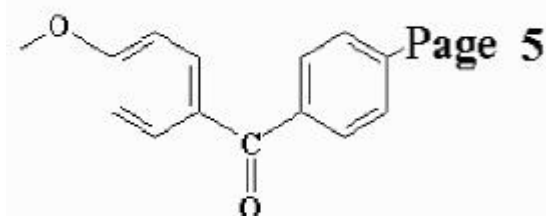

Natural mineral containment absorbent material. Non-leaching, environmentally safe. Absorbs all liquids (oil & water) except hydrofluoric acids. Effect to 15 x equivalent weight of clay absorbents. Fire retardant built in. Dust minimizer.

TRI - C

(TRB 522)

(carb & choke)

Liquid aerosol spray for burner tips, manifold heat control valves, Removes carbons, oils, and general foulings.
