

# SANITROL

Technical Data	<b>Sanitizer</b>			
	<b>DESCRIPTION:</b>	Liquid sanitizing and disinfecting agent.		
<b>USED FOR:</b>	SANITROL is a liquid concentrated sanitizer and disinfectant for use in food processors, motels, cafeterias, kitchens, laundries and any environment requiring general sanitization, or control of mold and bacteria.			
<b>ADVANTAGES:</b>	It is excellent as a final sanitizing rinse on dishes, glassware, utensils, milk cans, etc. It is effective for deodorizing and disinfecting towels and linens, a necessity for commercial laundries, applied directly to the washing machine. In any industry, SANITROL is unsurpassed in retarding the growth of mold, mildew, and odour causing bacteria on floors and walls.			
<b>DIRECTIONS:</b>	<p>For general disinfecting and deodorization, clean with suitable detergent such as H.G. CONCENTRATE and rinse thoroughly. Add 28 ml of SANITROL to 4.5 litres of water. Apply solution freely over surfaces to be deodorized and disinfected.</p> <p>For bacterial and mold control on ceilings and walls, clean thoroughly and rinse, then sponge with solution containing 58 ml of SANITROL per 4.5 litres water.</p> <p>Repeat applications as necessary to maintain control.</p>
