

SCALZOFF

Technical Data	Multi-Use Safety Descaler
	<p>DESCRIPTION: Dark red liquid, slight odour.</p> <p>USED FOR: Scalzoff is an industrial concentrated, colour coded descaler for rust, lime, calcium and other deposits from dishwashing equipment, toilets, urinals, sinks, drinking fountains, sterilizers and ceramic tile.</p> <p>ADVANTAGES: It is formulated only from natural ingredients and contains no poisonous residues. Free from heavy metals and poisonous residues. Completely soluble in water. Leaves no residue. Leaves no "taste".</p> <p>DIRECTIONS:</p> <p><u>Dishwashers:</u> Fill wash tank with only enough water to obtain complete circulation throughout machine. Add one part Scalzoff to each of 5 parts water in wash tank. Circulate solution on wash cycle for 5-15 minutes, depending upon the amount of scale. Drain machine and fill wash tank with clear, potable water. Circulate on wash cycle for 2 minutes then drain.</p> <p><u>Toilets & Urinals:</u> Flush first. Apply Scalzoff onto bowl surfaces and spread with bowl swab. Let stand 3-5 minutes. Swab into trap and flush.</p> <p><u>Sinks:</u> Dilute with 1-3 parts water. Swab down and flush thoroughly with water.</p> <p><u>Drinking Fountains:</u> Dilute with 2-5 parts water. Swab area thoroughly and agitate where necessary. Rinse thoroughly with water.</p> <p><i>Note: Scalzoff is colour coded and will change colour from red to purple to blue as the active ingredients become spent. Re-apply Scalzoff as the colour changes from red to purple to remove heavy scale accumulations.</i></p> <p>Caution: Do not use on magnesium, zinc or galvanized surfaces. Check before using on porcelain coated and laminated surfaces.</p>
